

MSU Eye Tracking Workshop for Language Researchers

with DR. ALINE GODFROID

Eye-tracking, the recording of a person's eye movements, has proven to be a valuable tool to study cognitive processes across a wide range of disciplines. This hands-on workshop features an introduction into the fundamentals of eye tracking and a chance to see eye tracking in action in our own Second Language Studies Eye Tracking Lab. Workshop participants will gain an understanding of how eye-movement registration may inform questions related to language processing, instruction, and use and have time to start developing their own eye-tracking projects.

Location: <https://msu.zoom.us/j/98423943208> (passcode required)
